Mostafa Vahedinezhad
Python + GNU/Linux

📍 Tehran - Iran ✉️ mosiatmci@gmail.com 🎨 mostafavn.ir 🖥️ End of military service

Summary

ABOUT ME

- I, Mostafa Vahdinezhad, am a Python programmer, website designer, and member of the GNU Linux community. With over 7 years of professional programming experience, I am delighted that you are reviewing my resume.

Skills

- **Gnu/Linux Experience:**

Proficient in setting up, configuring and maintaining Debian and RHEL Linux distributions and Passing the Lpic 1 & Lpic2 course.

- **Python programming language:**

With 7 years of experience working with Python and its various libraries, including releasing my own library on the official Python repository (PyPI) in 2019, authoring the book "Python" and teaching it at Lahijan Azad University and reputable websites such as Faradars.

- **Devops**

Internship experience with the DovOps team and completing multiple sensible projects for process automation, as well as experience using other tools such as Terraform, Prometheus, and Elk.

- **Security:**

Experience working with firewalls such as **csf**, **ufw**, **firewalld** and other security tools such as **imunify** and writing security scripts with python and bash such as _autowhite_, _ssh restrictions_ and the release of _BlindOwl_ tool in 2018

- **Server configuration:**

Expert in installing and configuring Linux servers by implementing tools cpanel , whm , aapanel , directAdmin , easyapache , litespeed , nginx , mysql , mariadb , cloudlinux , jetbackup , mail , dns management and ...

- **other scripts:**

Smart actions in critical situations and building server-side application scripts for company purposes, eg Creating a _cpanel & WHM plugin_, _IPv6 deactivation_ script , _csf auto whiter_, Automatic server configuration script in _python_ and _bash_ languages, Script for _automatic transfer_ of users from directAdmin to Cpanel And ....
